i am distressed at the possibility that microsoft will not be treated with justice

i am a computer tech with 9 years working on peoples computers. i have seen the web born and age. i have seen all the anti-free market and anti-innovation that mr gates has deployed. please punish this man and get him counseling.

the hold out 9 states are speaking the truth in the matter at hand and so history will show whether you act justly or unjustly.

make windows be just an operating system...period.

if the world was running on linux and oracle it is possible sept 11th would not have happened

please please do the right thing

follow those 9 states recommendations...all of them...i know they are the right actions

please please do it.
